

12-position distribution box

Overview

The M12 push-pull distributor simplifies applications in machine construction, automation and intralogistics by bundling the wiring of sensors and actuators in an IP67 environment. It combines signals and power supply via M12 sockets and drives them via an M23 collective output. Alongside sensor modules, the product lineup includes connector housings with or without trunk cables, M12 distribution cables, and essential accessories. Global Recycled Standard (GRS) certified products contain recycled content that has been independently verified at each stage of the supply chain, from the source to the final product and meet social, environmental, and chemical requirements. Perfect for organizing circuits and protecting your electrical systems. There is also a Smart Junction Box version with an Integrated PLC available.
