

36-port core switch

Overview

A 36 Port Core Switch is a high-performance network device designed for efficient data routing, low latency, and scalability. Edge to core stackable platform, from 1 Gigabit to 100 Gigabit, all within 15. A simplified user interface makes it easy to assign configuration profiles to each port. NETGEAR IGMP Plus™ provides multicast functionality right out of the box for most AV over IP applications. L2+ managed Ethernet switch with 16*100/1000Base-X SFP fiber ports and 8*10/100/1000Base-T RJ45 or 8*100/1000Base-X SFP fiber ports (combo port) and 4*1/10G SFP+ fiber ports. It built-in 60W power supply and 1U/19" cabinet installation. OVERVIEW The ONV36368FM is a 10G L2+ managed Ethernet fiber switch independently developed by ONV. It has. Huawei campus switches are ideal for building future-proof campus networks with simplified management, high reliability, and service intelligence, across industries such as enterprises, governments, education, finance, and manufacturing.
