

360 Gigabit Fiber Optic Router

AI Overview

A 360 Gigabit fiber optic router is designed to handle ultra-fast fiber internet, supporting multi-gigabit speeds, Wi-Fi 6/7 standards, and multiple wired and wireless connections simultaneously. Key Features to Consider:

- High-Speed Performance:** Modern fiber routers, such as the ASUS RT-BE86U or NETGEAR Nighthawk RS700S, support Wi-Fi 7 (802.11be) and can deliver speeds up to 6.5 Gbps under optimal conditions, making them ideal for streaming 4K/8K content, online gaming, and large file transfers.
- Wired Connectivity:** Look for routers with multi-gigabit ports, including 2.5G or 10G LAN/WAN ports, and support for LAN aggregation to combine ports for higher throughput. This ensures maximum utilization of fiber internet plans and stable connections for multiple devices.
- Wireless Coverage:** High-end routers feature multiple internal or external antennas to cover large areas, often exceeding 3,500 sq. ft., and can handle dozens of devices simultaneously without performance degradation.
- Compatibility with Fiber:** Not all routers can connect directly to a fiber line. Routers with an integrated fiber modem (GPON, XGS-PON) can connect directly to the fiber outlet, while standard routers require an ONT (Optical Network Terminal) provided by your ISP.
- Advanced Features:** Many routers include AI WAN detection, smart connectivity options, security suites, parental controls, and support for multiple frequency bands (2.4 GHz, 5 GHz, and 6 GHz) to optimize network performance and security.

Recommended Options:

- ASUS RT-BE86U:** Wi-Fi 7, quad-core 2.6 GHz CPU, 10G WAN/LAN, dual 2.5G ports, supports multiple devices and heavy network usage.
- NETGEAR Nighthawk RS700S:** Tri-band Wi-Fi 7, multi-gig speeds, strong coverage, ideal for gaming, streaming, and business use.
- FRITZ!Box 5690 Pro:** Integrated fiber modem, direct connection to fiber line, combines modem and router functions, simple setup, energy-efficient.
- Amazon eero Pro 7:** Tri-band Wi-Fi 7 mesh system, supports up to 5 Gbps, suitable for large homes and multiple devices.

Conclusion: For a 360 Gi...
