

48-core optical cable 45 km long

Overview

Overview: The 48 Core GYTY53 Fiber Optic Cable is a robust, fully armored outdoor cable engineered for long-distance transmission and direct burial applications. It shall s cable can be used for outdoor data communications connections including CATV, telecom trunk and ac OS2. OPGW, or Optical Ground Wire, is a self-supporting cable used for the installation of optical fibers on overhead power transmission lines. It consists of lightning protection and high-speed optical communication capabilities within a single unit. Featuring single-mode fibers compliant with ITU-T G. 652D and armored with steel tape, it meets IRS:TC 55-2006 Rev. A related GYTA type cable is available. Designed to support massive data throughput and scalable network architectures, this type of cable plays a vital role in connecting cities, campuses, and.
