

# Australian Ladder Cable Tray Price Quote

## AI Overview

Ladder cable trays in Australia typically range from AUD 50 to AUD 300 per meter, depending on material, size, and load capacity.

**Pricing Overview** The cost of ladder cable trays varies based on several factors:

- Material:** Steel (galvanised or stainless) is generally more affordable than aluminium or FRP (fibreglass reinforced plastic), which offer corrosion resistance and lightweight properties.
- Size and Load Capacity:** Wider trays with higher load ratings cost more. Standard widths range from 100 mm to 600 mm, and deeper trays for heavy industrial cabling are priced higher.
- Length and Accessories:** Trays are sold in straight lengths, typically 2–3 meters, with additional costs for bends, tees, reducers, and risers. Accessories like threaded rods, holders, and channel nuts also add to the total cost.

**Supplier Examples** EzyStrut offers steel, aluminium, and FRP ladder trays for industrial, mining, and commercial applications, with customisable options for load, corrosion resistance, and fire rating. AGM Electrical provides durable ladder trays with factory-direct pricing, emphasizing affordability and compatibility with threaded rods and other accessories. RS Australia supplies a wide range of ladder trays, including stainless steel for high corrosion resistance, aluminium for lightweight installations, and galvanised steel for cost-effective solutions.

**Practical Considerations** Ladder trays are preferred for industrial and outdoor projects due to their open structure, which allows airflow, easy cable routing, and maintenance. Prices can fluctuate based on project volume, supplier, and delivery location. Bulk orders often receive discounts. For precise pricing, it is recommended to request a quote from suppliers like EzyStrut, AGM Electrical, or RS Australia, specifying material, width, length, and load requirements. By considering these factors, you can select a ladder cable tray that balances cost, durability, and suitability for your specific project.
