

Austrian Tray Cable Tray Price

AI Overview

Austrian tray-type cable trays, including wire mesh and stainless steel options, typically range from €20 to €150 per meter depending on material, size, and load capacity.

Overview of Cable Tray Types

Austrian cable trays are available in several types:

- Wire Mesh Trays:** Open-grid design, ideal for industrial and commercial installations, providing excellent ventilation and easy access for maintenance. These are commonly made from galvanised steel or stainless steel and are modular for flexible installation.
- Perforated or Solid Trays:** Offer higher mechanical protection and are suitable for heavy-duty power cables. They are often hot-dip galvanised or stainless steel to resist corrosion.
- Accessories:** Complete systems include connectors, bends, tees, reducers, brackets, and covers, which can add to the overall cost.

Price Considerations

The price of Austrian cable trays depends on several factors:

- Material:** Stainless steel trays are more expensive than galvanised steel or plastic trays. Wire mesh trays are generally mid-range in cost.
- Dimensions:** Standard widths range from 100 mm to 400 mm, with heights from 30 mm to 110 mm. Larger or custom sizes increase the price.
- Load Capacity:** Heavy-duty trays designed for industrial power cables cost more than light-duty trays for data or control cables.
- Supplier and Quantity:** Bulk orders or direct purchases from Austrian manufacturers like VALDINOX or GroupSumi may reduce per-meter costs.

Estimated Price Range

Based on supplier information and typical European market trends:

- Light-duty wire mesh trays: €20–€50 per meter
- Medium-duty perforated or solid trays: €50–€100 per meter
- Heavy-duty stainless steel trays: €100–€150 per meter

For precise pricing, it is recommended to contact Austrian suppliers directly for quotes, as prices vary with material grade, dimensions, and order volume.

Additional Tips

Consider accessories and installation hardware in your budget, as these can add 10–20% to the total cost. Check for compliance with DIN EN 61537 and IEC standards to ensure safety and durability. F...
