

Blokset integrated power supply

Overview

Blok SeT is low voltage switchboard for power distribution and motor control up to 7000A, manufactured by Schneider Electric or our licensed partners, with great safety, reliability, dependability, and intelligence. The new generation Blok SeT is integrated with best-in-class technology to offer. Active arc flash detection to maximize people safety and minimize damage to the installation. Digital solution for PCC and MCC. Manage, Monitor and Control Industrial Installation analytics, and services. Continuously communicating in real time within a cybersecure environment, they give you complete visibility to advanced smart solution. The coordination aims to protect the equipment and. type tested and compliant with IEC61439-1 and IEC61439-2. exclusively designed for and type-tested with Schneider Electric components: guarantee of the highest performance and safest use of components from the world. The PreSense low-voltage switchgear system solution is a new generation of BlokSeT 5000 PreSense low-voltage switchgear equipment authorized by Schneider Electric to Tianrun Company.
