

Blue optical cable model

AI Overview

Blue optical cables are typically multi-mode fiber (MMF) or single-mode fiber (SMF) cables with a blue jacket, used for short- to medium-range data transmission in data centers and LANs.

Types and Specifications

Multi-Mode Fiber (MMF): Blue optical cables are often multi-mode, designed to carry multiple light signals simultaneously within a single core. They are ideal for short- to medium-distance applications such as intra-rack or inter-rack connections in data centers, local area networks (LANs), and server interconnections. Multi-mode fibers provide high bandwidth while keeping installation and maintenance costs low.

Single-Mode Fiber (SMF): Some blue optical cables are single-mode, featuring a narrow core (typically 8-10 microns) for long-distance, high-speed data transmission. These are used when precise, long-range connectivity is required, such as between buildings or across campus networks.

Connector Types: Common connectors for blue optical cables include LC, SC, ST, and MPO, depending on the network setup. For example, L-com offers dual LC connectors for 10G Ethernet applications.

Data Rates and Standards: Blue optical cables support various data rates, including 10GBASE-SR for 10 Gbps Ethernet, and higher-speed standards like QSFP28 or SFP28 for 100G networks. Active optical cables (AOCs) with SFP+ ends are available for intra-rack and inter-rack links, supporting bit rates up to 10.3125 Gb/s.

Applications

Data Centers: Blue optical cables are widely used for server connections, patch panels, and high-density racks.

LANs and Interconnects: They facilitate short-range communication between switches, routers, and storage systems.

Industrial and Ruggedized Use: Some blue cables feature polyurethane sheathing or armored designs for environmental protection and durability in industrial settings.

Manufacturers and Models

BlueOptics: Offers a range of SFP, SFP28, QSFP28, and MPO cables, including high-performance patch cables in blue for multi-mode and single-mode applications.
