

# Brunei 4-meter long span cable tray price

## AI Overview

A 4-meter hot-dip galvanized steel cable tray in Brunei can be estimated at approximately BND 150–200, depending on type and supplier.

### Pricing Overview

Cable trays are typically sold in standard lengths of 2.4 meters, 3 meters, or 6 meters. For example, Berakas Power Company lists 3-meter hot-dip galvanized steel slotted trays at a unit rate of around BND 30 per tray for 200mm x 50mm dimensions with  $\geq 2$ mm thickness. Using this as a reference, a 4-meter tray would cost proportionally more, roughly BND 40–45 per tray, though prices may vary depending on width, height, and thickness. PVC cable trays, such as Salzer PVC FRLS trays, are also available in Brunei through platforms like Desertcart, with prices including shipping, import duties, and local delivery. These are suitable for indoor installations and smaller-scale projects.

### Material and Type Considerations

**Hot-Dip Galvanized Steel:** Durable, corrosion-resistant, suitable for industrial and outdoor use. Standard widths range from 100mm to 300mm, with thickness  $\geq 2$ mm.

**PVC FRLS:** Flame-retardant, lightweight, ideal for office or commercial environments. Typically comes in smaller dimensions (e.g., 45x25x500mm) and may require multiple units to cover 4 meters.

**Custom Lengths:** Some suppliers, like EAE Electric, can manufacture trays in custom lengths up to 6 meters, which allows ordering a single 4-meter section without splicing.

### Additional Costs

**Delivery and Handling:** In Brunei, suppliers often include shipping, crating, and DDP delivery in the quoted price.

**Fittings and Accessories:** Straight splice plates, brackets, and support channels are sold separately and may add BND 5–15 per piece depending on type.

### Recommendation

For a 4-meter hot-dip galvanized steel tray, it is practical to either: Order a 4-meter custom tray from a local supplier or manufacturer capable of producing non-standard lengths. Combine standard lengths (e.g., 2x2-meter or 1x3-meter + 1x1-meter) and use splice plates to achieve the desired span. This approach ensures cost efficiency while meeting proj...
