

# Cable tray fixing bracket styles

## AI Overview

Cable tray fixing brackets come in multiple styles including stand-off, G hanger, trapeze, U brackets, Z-shaped, and single base plate brackets, each designed for specific mounting and support needs.

**Common Types of Cable Tray Brackets**

**Stand-Off Brackets:** These are used to mount cable trays or baskets at a specific distance from walls or surfaces, providing clearance for airflow and maintenance. Sizes typically range from 50mm to 300mm, and they are made from materials like pre-galvanized steel, hot-dipped galvanized steel, or stainless steel for corrosion resistance.

**G Hanger Support Brackets:** Designed for overhead support of cable trays, trunking, or baskets, G hangers are available in sizes such as 100mm, 150mm, and 225mm. They are rigid, easy to install, and suitable for heavy-duty applications.

**Trapeze Support Brackets:** Pre-assembled for quick installation, trapeze brackets support cable trays with various widths and drop lengths. They are ideal for suspending multiple trays from ceilings or overhead structures, providing robust support and alignment.

**Bracket Arms and U Brackets:** Bracket arms are used for horizontal wall-mounted installations, while U brackets (also called “riding horse” brackets) are ideal for vertical wall-mounted trays. Both provide stability and ease of maintenance, typically installed at intervals of 1.5 to 2 meters with expansion bolts for secure attachment.

**Z-Shaped Brackets:** These brackets are used to join two surfaces at right angles, making them suitable for corner installations or angled support. They are versatile and can be used in various orientations.

**Single Base Plate Brackets:** These provide a straightforward mounting solution between a vertical surface and a horizontal beam or shelf, offering robust support with simple installation.

**Materials and Finishes**

Cable tray brackets are commonly made from Q235 carbon steel, stainless steel (201, 304, 316), or pre-galvanized steel. Surface treatments include hot-dip galvanizing, powder coating, fireproofing, and aluminum-magnesium-zinc plating, enhancing durability a...
