

Cable tray steel plate price

AI Overview

Steel cable trays typically cost between \$10 and \$30 per meter, depending on material, coating, and type. Steel cable trays are widely used due to their mechanical strength and durability, making them suitable for heavy-duty installations. The price varies based on several factors:

- Material and Coating:** Mild steel is the most common and cost-effective option, often coated with powder or galvanization to prevent rust. Stainless steel offers superior corrosion resistance and longevity but comes at a higher price. Galvanized steel balances durability and cost, while HDG (hot-dip galvanized) provides extra protection for outdoor or corrosive environments.
- Tray Type:** Ladder trays are more expensive due to their ability to support heavy cables. Perforated or wire mesh trays are cheaper and suitable for lighter loads.
- Market and Order Factors:** Bulk orders can reduce the per-meter cost significantly. Prices fluctuate with raw material costs, supply chain conditions, and regional labor rates.

Typical Price Ranges:

- Steel trays: \$10–\$30 per meter
- Aluminum trays: \$20–\$50 per meter
- Custom or coated trays: Higher than standard ranges

For large-scale projects, it is recommended to compare suppliers, consider bulk purchasing, and select the appropriate coating to balance cost and durability. This ensures both long-term performance and cost efficiency in cable management systems.
