

Cambodia door-to-door shipping of 800G optical modulators

AI Overview

800G optical modulators can be shipped to Cambodia via door-to-door delivery using DAP, DDU, or DDP services, with specialized logistics providers handling customs and last-mile delivery. Market Context Cambodia has been actively importing optical modulator modules, with 119 shipments recorded from June 2023 to May 2024, primarily from Vietnam and Tanzania, indicating a growing demand for high-speed optical components. Globally, 800G optical transceivers are experiencing rapid growth, with shipments expected to reach nearly 63 million units in 2026 due to AI and hyperscale data center expansion. Key suppliers include Lumentum, Coherent, Mitsubishi, Sumitomo, and Broadcom, with lead times extended due to upstream bottlenecks in laser sources. Shipping Options For door-to-door delivery in Cambodia, logistics providers offer three main options: DAP (Delivered at Place): The seller delivers the goods to a specified Cambodian address, but the buyer handles unloading, import duties, and local transport. DDU (Delivered Duty Unpaid): The seller delivers to the buyer's location, but the buyer is responsible for customs clearance and duties. DDP (Delivered Duty Paid): The seller manages the entire shipping process, including customs clearance and import duties, delivering the goods directly to the buyer's doorstep. This is the most convenient option for high-value items like 800G optical modulators. Local Cambodian providers such as Growwell Logistics and DRSB Express offer full door-to-door services, including pickup from the supplier, customs handling, and delivery to any province in Cambodia. DRSB Express also supports real-time tracking and app-based inquiries, which is useful for monitoring sensitive optical equipment. Considerations for 800G Optical Modulators Lead Times: Due to global demand and limited EML laser suppliers, expect extended lead times...
