

Can Huawei 9306 switches be connected to OLT devices at the lower layer

Overview

Member switches can be connected through the service ports on LPUs. These service ports can be configured as stack member ports and added to a logical stack port to enable connection through SFP+ optical modules and fibers, or direct connection through SFP+ stack cables. : Access product manuals, HedEx documents, product images and visio stencils. When a switch is used. The Huawei GPON (Gigabit Passive Optical Network) add-on allows you to manage Huawei GPON OLT (Optical Line Terminal) devices directly from Splynx. To connect the QSFP+ stack ports with QSFP+ copper cables, directly connect the copper cables to the stack ports. WARNING and items. If the switch is running V200R012C00 or a later version, it allows combining the use of 2200 W AC, 2200 W DC, 3000 W DC, and 3000 W AC power modules.
