

Chad Fire-Resistant Cable Tray Price Quotation

AI Overview

Fire-resistant cable trays in Chad typically range from \$25 to \$150 per meter, depending on material, type, and fire rating.

Overview Fire-resistant cable trays are essential for protecting electrical wiring in industrial, commercial, and high-safety environments. They are available in various types, including ladder trays, perforated trays, mesh trays, and enclosed trays, and are commonly made from galvanized steel, stainless steel, or aluminum. Stainless steel trays offer superior fire and corrosion resistance, while galvanized steel is more cost-effective for general applications.

Price Factors

- Material:** Stainless steel trays are more expensive than galvanized steel or aluminum due to higher durability and fire resistance.
- Tray Type:** Ladder and mesh trays are generally less expensive than fully enclosed or mineral-insulated (MI) trays.
- Fire Rating:** Trays tested to standards like UL 1724 or NFPA 70 may cost more due to certification and enhanced fire protection.
- Customization:** Custom sizes, coatings (intumescent paints), or specialized designs for high-risk zones can increase the price.
- Supplier and Delivery:** Local suppliers in Chad, such as Brilltech Engineers Pvt. Ltd and Cable House, offer competitive pricing, but imported trays may incur additional shipping and import costs.

Approximate Price Range

- Basic galvanized steel ladder or perforated trays: \$25-\$50 per meter
- Stainless steel or coated fire-resistant trays: \$60-\$120 per meter
- High-end enclosed or mineral-insulated trays: \$120-\$150 per meter

These prices are indicative and can vary based on quantity, supplier, and specific project requirements. For precise quotes, contacting local suppliers in Chad directly is recommended, as they can provide customized solutions and bulk pricing.

Recommendation When purchasing fire-resistant cable trays in Chad, consider material durability, fire rating, and installatio...
