

Cost of 800mm deep steel cable trays

AI Overview

An 800mm deep steel cable tray typically costs between £150 and £400 per meter, depending on material, finish, and supplier.

Price Overview

The cost of an 800mm steel cable tray varies based on several factors:

- Material:** Standard galvanized steel trays are generally less expensive, while stainless steel trays with premium corrosion resistance are more costly, suitable for outdoor or chemical-prone environments.
- Length:** Prices are often quoted per standard length, usually 2.4 meters for ladder-type trays.
- Supplier and Finish:** Hot-dip galvanized trays are common and durable, whereas powder-coated or stainless steel options increase the price.

Typical market prices for 800mm deep steel trays are approximately:

- Galvanized steel: £150–£250 per meter
- Stainless steel: £300–£400 per meter
- Aluminum or FRP alternatives: Can vary widely, often £200–£350 per meter depending on specifications.

Additional Considerations

- Fittings and Accessories:** Elbows, tees, and supports are priced separately, usually per piece, and can add 10–20% to the total installation cost.
- Load Capacity:** Heavier-duty trays designed for industrial applications may cost more due to thicker gauge steel or reinforced construction.
- Supplier Options:** UK suppliers like CEF and RS Components offer steel cable trays with varying sizes and finishes, sometimes including next-day delivery for smaller trays.

Summary

For budgeting purposes, an 800mm deep steel cable tray can be expected to cost roughly £150–£400 per meter, with the final price influenced by material type, length, and supplier. For precise pricing, it is recommended to request a quote from suppliers specifying the tray type, finish, and required length.
