

Cost of galvanized cable tray supports in Canada

AI Overview

Galvanized cable tray supports in Canada typically range from CAD 50 to CAD 300 per support, depending on size, load capacity, and customization.

Pricing Overview The cost of galvanized cable tray supports varies based on several factors: **Material and Finish:** Standard galvanized steel supports are generally more affordable than custom stainless steel or aluminum options. **Size and Load Capacity:** Supports designed for heavy-duty or long-span cable trays cost more due to increased steel thickness and structural reinforcement. **Customization:** Modular, bolt-together supports or custom-designed frames for specific layouts can increase costs.

Pre-engineered modular systems reduce installation time but may have higher upfront costs. **Supplier and Brand:** Prices differ between suppliers like Mechano Max, ABB Electrification Canada, and Unitray, with some offering CSA-approved or ISO-certified products.

Typical Cost Ranges Standard modular galvanized supports: CAD 50–150 per unit for typical industrial applications. Heavy-duty or custom supports: CAD 150–300 per unit, especially for large cable trays or complex configurations.

Accessories and fittings: Splice plates, brackets, and clamps may add CAD 10–50 per piece depending on size and material. **Installation Considerations** Modular, bolt-together supports eliminate welding and hot-work permits, reducing labor costs and installation time.

Supports are typically spaced every 5 feet for horizontal runs, which affects total project cost. Pre-assembled or express delivery options may slightly increase unit cost but save on on-site labor.

Supplier Guidance Mechano Max: Offers modular, adjustable galvanized supports shipped across Canada with free quotes. ABB Electrification Canada: Provides T&B galvanized metallic cable tray systems suitable for evolving wiring needs. Unitray: Supplies CSA-approved aluminum and st...
