

Cost of zinc-coated cable trays in Sri Lanka

AI Overview

Zinc-coated (hot-dip galvanized or Alu-Zinc) cable trays in Sri Lanka typically range from LKR 1,500 to LKR 5,000 per meter, depending on size, thickness, and supplier.

Overview of Zinc-Coated Cable Trays Zinc-coated cable trays, including hot-dip galvanized and Alu-Zinc options, are widely used in Sri Lanka for industrial, commercial, and outdoor applications due to their corrosion resistance and durability. These trays are available in various materials such as steel, aluminum alloy, and Alu-Zinc, with thicknesses commonly ranging from 1.2mm to 2mm depending on load requirements. They are suitable for both indoor and outdoor installations and can support heavy cable loads while maintaining organized wiring systems.

Price Factors The cost of zinc-coated cable trays in Sri Lanka depends on several factors:

- Tray dimensions:** Widths typically range from 100mm to 600mm, and larger trays cost more.
- Material thickness:** Thicker trays (e.g., 1.5mm or 2mm) provide higher load capacity but are more expensive.
- Coating type:** Hot-dip galvanized trays are slightly more expensive than standard electro-galvanized trays due to superior corrosion protection. Alu-Zinc coated trays offer additional anti-corrosion benefits and may command higher prices.
- Supplier and brand:** Local suppliers like Eastlink.lk and C & D International offer competitive pricing, while imported trays may cost more due to shipping and import duties.
- Accessories:** Lids, joints, and mounting brackets can add to the overall cost.

Typical Price Range Based on supplier listings and market trends in Sri Lanka:

- Small to medium trays (100–300mm width, 1.2–1.5mm thick): LKR 1,500–2,500 per meter.
- Larger trays (400–600mm width, 1.5–2mm thick): LKR 3,000–5,000 per meter.

Complete systems with lids and accessories: Prices may increase by 10–20% depending on configuration.
