

Custom Metal Mesh Cable Tray Quotation

AI Overview

Custom metal mesh cable trays are available in stainless steel or galvanized finishes, with fully customizable sizes, load capacities, and accessories, suitable for industrial and commercial projects.

Customization Options

Materials: Stainless steel (SS202, SS304, SS316) or galvanized steel for corrosion resistance and durability.

Sizes: Widths from 50mm up to 600mm, heights of 50mm or 100mm (JLH offers up to 200mm), and lengths from 1m to 3m, with the ability to match specific drawings.

Wire Diameter: Typically 3.5–6mm for stainless steel trays, providing strong support while allowing ventilation.

Load Capacity: Standard industrial trays handle 200–500 lbs/ft, with recommendations to exceed maximum cable weight by 30%.

Features and Benefits

Ventilation and Heat Dissipation: Open mesh design ensures airflow, preventing cable overheating.

Flexible Installation: Trays can be bent, cut, or configured on-site for curves, slopes, tees, and elevation changes.

Accessories: Supports, bends, connectors, and fast connection profiles are available for quick assembly.

Certifications: Compliant with IEC 61537, NEMA VE 1, or UL 1569 standards, with full test certificates provided.

Quotation Considerations

When requesting a quotation, provide the following details to suppliers:

Material preference (SS304, SS316, or galvanized).

Dimensions (width, height, length, and wire diameter).

Quantity (single units or bulk order).

Load requirements and environmental conditions (indoor, outdoor, corrosive).

Accessories needed (bends, tees, supports).

Delivery location and timeline.

Recommended Suppliers
