

Custom-made electrical distribution boxes for construction sites in Vietnam

AI Overview

Custom-made electrical distribution boxes in Vietnam provide tailored, safe, and durable solutions for construction site power management. Overview Custom electrical distribution boxes, also known as switch boxes or distribution boards, are designed to safely control and distribute electricity at construction sites, factories, and industrial facilities. Unlike standard boxes, custom boxes are tailored to project-specific requirements, including load capacity, layout, environmental conditions, and future expansion needs, ensuring reliable operation and worker safety (E-Abel) .Key FeaturesMaterials: High-quality sheet steel, stainless steel, or die-cast aluminum alloy are commonly used. Sheet steel offers high mechanical strength for large enclosures, while aluminum provides lightweight, corrosion-resistant, and thermally efficient solutions (VINACNC) .Protection and Safety: Custom boxes include circuit breakers, relays, busbars, and protective devices to prevent overloads, short circuits, and electrical faults. IP-rated enclosures protect against dust, water, and humidity, which is crucial for tropical climates like Vietnam (E-Abel, VINACNC) .Modular and Flexible Design: Modular layouts allow easy upgrades and expansion as construction projects grow. Custom moulds ensure precise mounting holes and cable entries for smooth assembly and installation (VINACNC) .Thermal Management: Ventilation or cooling options help manage heat generated by high loads, maintaining stable operation even in high-temperature environments (E-Abel) .Compliance: Many suppliers ensure compliance with international and Vietnamese standards, such as IEC 61439, TCVN 7994-1:2009, and ISO 9001:2015, guaranteeing quality and safety (IREX, Nam Phuong Viet) .ApplicationsConstruction Sites: Power distribution for temporary or permanent site installations, ensuring safe and reliable electricity supply for machin...
