AI Overview

Direct sales of optical switch SFP modules are available from specialized suppliers offering SFP, SFP+, QSFP, and other transceivers with guaranteed compatibility, warranties, and bulk purchasing options.

Overview of SFP Modules

SFP (Small Form-factor Pluggable) modules are hot-swappable optical transceivers used in network switches, routers, and storage devices to provide fiber optic or copper connectivity. They support various speeds, including 1G, 10G, 25G, 40G, 100G, and beyond, depending on the module type (SFP, SFP+, SFP28, QSFP+, QSFP28, QSFP-DD) and the network requirements. SFP modules can operate over single-mode fiber (SMF) or multi-mode fiber (MMF), with transmission distances ranging from 100 meters to over 100 kilometers.
