

# Distribution Box E04

## Overview

This box is used as a termination point for the feeder cable to connect with drop cable in FTTX communication network system. Subject to change without notice. © 2025 IMO Precision Controls Ltd Due to the difference in frame size, isolators of frame size 1 (16A to 38A) and frame size 2 (40A to 65A) cannot be mounted on the same DIN rail. Meanwhile, it provides solid protection and management for the FTTX. Configure your emergency and safety lighting in just a few steps. Not having its own battery, this system serves to remove circuits and reduce the work/material involved in installation. The energy supply (AC/DC voltage) is own to the installation level. Available in a range of sizes, they can be deployed above grade (pole, facade) or below grade (manhole, handhole).
