

Fiber Optic Fusion Tray Price

AI Overview

Fiber optic fusion splice trays typically range from \$10 to \$50 for standard 12- to 24-strand trays, with higher-capacity or specialized trays costing more.

Typical Pricing

- 12-Strand Trays:** Basic 12-strand fiber optic fusion splice trays are available on Amazon for around \$10–\$20 per tray, depending on brand and included accessories such as splice protectors or mounting hardware.
- 24-Strand Trays:** Mid-capacity trays, such as the FS Fiber Optical Splice Tray for FHD rack mount enclosures, are priced around \$25–\$40 on eBay and other online marketplaces.
- Higher-Capacity Trays (36, 48, 72 strands):** Specialty trays from brands like Corning, PLP, or AFL can cost \$40–\$70 or more, depending on the enclosure compatibility and whether they support fusion or mechanical splices.

Factors Affecting Price

- Capacity:** Trays that hold more fusion splices generally cost more.
- Brand and Quality:** Premium brands like Corning or CommScope may be priced higher due to durability and compatibility with professional enclosures.
- Type of Splice:** Trays designed for fusion splices are typically slightly more expensive than those for mechanical splices.
- Accessories:** Some trays include splice protectors, pigtails, or mounting hardware, which can increase the price.

Where to Buy

- Amazon:** Offers a wide range of 12- to 24-strand trays with prices starting around \$10.
- eBay:** Good for 24-strand or higher-capacity trays, often with fast shipping options.
- Specialized Suppliers:** FiberOptics4Sale and CommScope provide professional-grade trays for enterprise or data center applications, with prices reflecting higher quality and compatibility.

In summary, for standard home or small-scale installations, expect to pay \$10–\$20 for 12-strand trays and \$25–\$40 for 24-strand trays, while enterprise-grade or high-capacity trays can exceed \$50–\$70 depending on brand and features.
