

Fiber optic cables require a dedicated router

Overview

The short answer is no, you don't necessarily need a special router for fiber optic internet. Fiber Optic Cables: Although these are the cables you don't touch, they're what makes your internet connection tick. Most fiber ISPs. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid. Fiber optic internet uses light to transmit data through fiber optic cables, which are made up of thin glass or plastic fibers. The cable carries data as light signals, which is why it's so much faster.
