

Fiber optic port panel on the wall

Overview

A Fiber Optic Socket Wall Outlet, also called a fiber optic faceplate or optical termination outlet, is a mounted interface designed to house and protect fiber optic terminations, such as SC, LC, or ST connectors. It's typically installed on walls to provide a clean endpoint for incoming fiber drop. Single and dual door fiber optic wall mount enclosures keep your patch panels, connectors, and additional wall mount fiber enclosure components safe and secure. We offer NEMA rated enclosures for top-of-the-line quality and durability on indoor and outdoor fiber patch panels. The Wall mount fiber enclosures are frequently. Whether you're setting up a home office network, a small data closet, or a remote telecom node, wall mount fiber patch panels offer a practical solution to terminate, manage, and secure fiber connections without the need for bulky racks or dedicated desk space. The WM-96 Wall mount fiber enclosures are.
