

Fireproof materials for cable trays in China and Europe

AI Overview

High-quality fireproof cable trays in China and Europe include FRP, stainless steel, aluminum, and galvanized steel options, often CE-certified for European compliance and GB-standard compliant in China.

Fireproof Cable Trays in China

China has a robust market for fireproof cable trays, with manufacturers offering a wide range of materials and designs to meet industrial and commercial needs. Key options include:

- FRP (Fiberglass Reinforced Plastic) Cable Trays:** Lightweight, corrosion-resistant, and highly fire-resistant, suitable for chemical plants, sewage facilities, and high-humidity environments.
- Stainless Steel (304/316) and Aluminum Trays:** Provide excellent structural strength, fire resistance, and durability, often used in server rooms, commercial complexes, and industrial plants.
- Galvanized Steel Trays:** Cost-effective, strong, and fire-resistant, with options for perforated or ladder designs.

Leading Chinese manufacturers, such as Zhejiang Rutong Electric Technology Co., Ltd., offer premium fireproof cable trays that undergo extensive safety testing to ensure compliance with national standards like GB 50057 and the "Code for Design of Building Electrical Installations". Many products also carry CE certification, making them suitable for export to European markets. Suppliers often provide customization for size, shape, and installation requirements, along with competitive pricing and bulk order discounts.

Fireproof Cable Trays in Europe

In Europe, fireproof cable trays must comply with EN 61537 and other regional fire safety standards. Common materials include:

- Steel Cable Trays:** Carbon steel or stainless steel trays with zinc coating for corrosion resistance, offering high fire resistance.
- Aluminum Trays:** Lightweight, corrosion-resistant, and suitable for high-rise buildings or areas requiring easy installation.
- Non-metallic Trays (FRP/Resin-based):** Provide excellent fire resistance...
