

Fireproof protective cover for cable trays

Overview

Flexible and tear-resistant fire protection wraps and bandages with an intumescent coating are used to seal pipes and cables. In case of fire, a solid foam body forms around the cable system or structural opening so that it is permanently sealed against the passage of fire and smoke. Effective protection of cable systems around the world: our tried-and-tested FLAMMOTECT-A and DG-CR 0.7 products are successfully used to protect cables in high-rise buildings, industrial buildings, and offshore facilities as well as in sensitive areas, such as hospitals, airports, production. Our range of trunking and cable tray protection products provide effective fire protection for pipes, cables and trunking within floors, walls and ceilings. Endoflex provides excellent cable tray fire protection. The endothermic, heat-absorbing properties are enhanced by the highly advanced polymer mat system developed specifically for ENDOFLEX. The ECPS has a silicone fireproof covering, which is very robust in protecting cables. Sold by the metre in roll form of 20 metres. Or also supplied in cut pieces as required.
