

French telecommunications tower manufacturer

AI Overview

TDF and TOTEM are the leading French telecommunications tower companies, providing infrastructure for mobile networks across France and its territories. TDF Group is a major French towerco that owns, operates, and maintains telecom towers, pylons, and rooftop sites throughout France and its overseas territories. The company deploys around 300 new towers annually, supporting mobile operators, local authorities, and private clients. TDF specializes in pooling multiple telecom services on a single site, offering solutions for indoor mobile coverage, secure professional networks, mobile edge computing, and smart city connectivity. The company also manages four data centers in Bordeaux, Lille, Rennes, and Marseille. TDF's infrastructure spans 9,200 sites, making it a key player in nationwide 4G and 5G coverage. TOTEM is a towerco spun off from Orange in 2021, operating as a neutral host with full operational autonomy. TOTEM manages 19,859 towers in France, including ground-based towers, flat rooftops, and other locations. The company focuses on providing high-quality infrastructure for mobile operators, institutions, and landlords, leveraging decades of Orange's operational experience. TOTEM's independence allows it to host multiple telecom services on its sites, supporting both urban and rural network expansion. Market Context The French telecom tower market is growing, driven by 5G rollout, independent towerco expansion, and renewable energy adoption. Independent tower companies, including TOTEM and TDF, accounted for over 60% of the market in 2025, with rooftop and ground-based towers being the primary installation types. Regulatory requirements mandate nationwide 5G coverage by 2030, prompting accelerated tower construction and upgrades. Other players, such as FPS Towers (now ATC Europe) and Cellnex, al...
