

Further optical cable

Overview

Fiber optic cables are, like their name suggests, a cable that uses light, rather than electricity to transmit information. They're made from silica glass fibers about the same width as a human hair, which allow the light to bounce back and forth down the length of the cabling. Browse our catalog of products grouped in the Fiber Optic Cables category. 2 m - 200 m, 1G/10 GB Single Mode Duplex LC-LC 9/125 um SMF Fibre.
