

Gyfdt optical cable

Overview

GYFTA optical cables are fiber optic cables renowned for their enhanced structural features and durability, predominantly used in various telecommunication settings. The term GYFTA stands for Loose Tube Non-Armored Fiber Optic Cable with an Aluminum Tape. It features an aluminum polyethylene laminate (APL) tape armor instead of steel, making it lighter and more corrosion-resistant than traditional. GYFTA fiber optic cable is stranded loose tube structure, The cable tubes, which are filled with filling compound, are stranded around the FRP strength member. Starting with customized packaging printing, your brand LOGO, safety warnings or specific information can be printed directly on the packaging carton boxes and packaging spool. Fiber optic technology has transformed the way we transmit data, enabling faster, more reliable connections than traditional copper cables. From the fiber core and core size to.
