

High-density optical cable fault locator wall-mounted in stock

Overview

The Visual Fault Locator VFF5 projects a highly visible laser light source into fibre optic cabling. This is used to check continuity, locate breaks, poor mechanical splices and damaged connectors. Spring into certainty with smarter testing and maximum savings. Order FS VFL with fast shipping now!SEL fault-locating technologies quickly and accurately locate transmission and distribution faults, enabling faster crew dispatch and service restoration. In today's fast-paced workplace maximizing productivity is essential. Whether installing new fiber links or troubleshooting an existing network, the faster you can locate a problem, the. Highly efficient pocket-size visual fault locator—the ideal complementary tool for any fiber-testing technician. To view the full specifications, download the spec sheet below.
