

How much does it cost per meter to lay a 12-core fiber optic cable

AI Overview

The price of a 12-core fiber optic cable typically ranges from \$0.50 to \$6.50 per meter, depending on type, construction, and quality.

Price Range

Standard 12-core fiber cable: Approximately \$0.50 per meter for basic indoor or non-armored versions with standard PVC jackets and generic glass cores.

Armored or LSZH (Low Smoke Zero Halogen) cables: Prices can rise to \$6.50 per meter, reflecting enhanced durability, fire safety, and premium materials.

Multimode (OM3/OM4) cables: Typically cost more than single-mode due to manufacturing complexity, ranging from \$1.50 to \$6.00 per meter.

Factors Affecting Cost

Cable Construction: Armored cables or those designed for direct burial are more expensive than indoor riser-rated cables.

Fiber Type: Single-mode fiber is generally cheaper than multimode fiber, but multimode supports higher-speed data transmission.

Jacket Material: LSZH jackets cost 25–40% more than standard PVC due to safety and environmental benefits.

Brand and Quality: Premium brands like Corning offer lower attenuation and higher reliability, increasing the price compared to generic glass.

Bulk Orders: Purchasing in large quantities from OEM or factory distributors can reduce the per-meter cost significantly.

Summary

For a 12-core fiber optic cable, expect a wholesale or standard retail price between \$0.50 and \$6.50 per meter, with the lower end representing basic indoor cables and the higher end representing armored, LSZH, or high-performance multimode cables. Prices vary based on fiber type, jacket material, and manufacturer, so contacting suppliers for bulk quotes or custom specifications is recommended for precise budgeting.
