

How much is 1000 meters of optical cable

AI Overview

The cost of 1000 meters of fiber optic cable ranges roughly from \$50 to \$6,500 depending on type, strand count, and construction. Price Range by Cable Type

Single-mode fiber (OS2): Typically costs \$0.30 to \$2.80 per meter, so 1000 meters would range from \$300 to \$2,800 depending on strand count and brand quality.

Multimode fiber (OM3/OM4): Higher-grade multimode cables cost \$1.50 to \$6 per meter, resulting in \$1,500 to \$6,000 for 1000 meters.

Armored cables: Designed for harsh environments or direct burial, these can cost \$1.15 to \$6.50 per meter, totaling \$1,150 to \$6,500 for 1000 meters.

Factors Affecting Cost

Fiber Count: More strands increase the price. A 2-core cable is much cheaper than a 24-core or 96-core cable.

Construction Type: Armored, loose tube, or tight-buffered cables are more expensive than standard indoor cables.

Jacket Material and Rating: Outdoor-rated PE jackets or LSZH (Low Smoke Zero Halogen) jackets cost more than standard PVC indoor jackets.

Pre-terminated vs. Bulk Cable: Pre-terminated cables with connectors are more expensive than raw cable reels.

Example Estimates

A basic 1-core FTTH drop cable costs around \$0.13 per foot (~\$0.43 per meter), so 1000 meters would be about \$430.

A high-count backbone cable (e.g., 288 strands) can reach \$6 per foot (~\$19.68 per meter), totaling nearly \$19,680 for 1000 meters, though this is for specialized enterprise applications.

Summary

For a standard 1000-meter fiber optic cable:

- Low-end single-mode: ~\$300–\$500
- Standard multimode: ~\$1,500–\$3,000
- High-end armored or high-strand-count cable: \$3,000–\$6,500 or more

The final cost depends heavily on fiber type, strand count, environmental rating, and whether the cable is armored or pre-terminated. Purchasing in bulk directly from manufacturers can reduce costs compared to retail pricing.
