

How to cut corners on cable tray covers

Overview

Mesh cable trays can be easily cut and bent onsite. Unlike these rigid alternatives, wire mesh trays offer the unique ability to be cut and bent on site, allowing for seamless navigation around corners, columns, and those often tricky tight ceiling spaces. Oglaend System manufacture and deliver Multidiscipline modular bolted support systems, cable trays, cable ladders and accessories for complete installation and containment of Instrument, Electrical, Telecom, HVAC and Piping. In the Oglaend System Cutting Guideline you can easily find out what the optimal cutting lengths/intervals are for all modular products. As well as, learn about what's important to consider before you start cutting, what tools we recommend and after treatment of products. Following the advice given. Video showing how we use the Milwaukee shear to cut aluminum and stainless cable tray covers. If you got tips and tricks leave them in the comments below. Developed by Interstates, this cable tray cutting guide acts as a guide for a. The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter.

Article Content

Assembly Guide

When a wire cable tray is cut, the fact that a wire has been cut does not affect the level of protection. Let alone we have rubber caps to protect the cut ends. The assembly guide below will help the cable tray
