

Huijue 86-type fiber optic panel price

AI Overview

The price of a Huijue 86-type fiber optic panel is not fixed and typically requires a direct quote from the supplier. Huijue Network manufactures 86-type fiber optic panels as part of their fiber optic equipment line, which includes network cabinets and FTTH solutions. Prices for these panels depend on factors such as order quantity, shipping location, and any customization requirements. Some suppliers may charge a sample fee, which can be refunded on future bulk orders, while shipping costs are usually negotiated separately. To obtain an accurate price: Contact Huijue Network directly through their official website or sales channels. Request a quote specifying the quantity, type (e.g., embedded FTTH panel), and any additional features. Consider bulk orders, as larger quantities often reduce the per-unit cost. Check for shipping and delivery terms, especially if ordering internationally. While exact prices are not publicly listed, similar 86-type fiber optic panels from other manufacturers typically range from \$10 to \$50 per unit for standard models, with higher-end or customized panels costing more. For the most reliable pricing, it is recommended to reach out to Huijue Network or authorized distributors to get a tailored quotation based on your specific requirements.
