

Hungarian Telecom Optical Module Project

Overview

FiberHome has launched its first European plant in Kisbér, Hungary, to locally produce optical cables. The €20M ZettaNet project, supported partly by the Hungarian state, aims to strengthen Chinese-Hungarian ties and enhance FiberHome's European footprint with high-tech. Telecommunications infrastructure service provider of the 4iG Group performed successfully in the second phase of Gigabit Hungary Programme (DIMOP_Plusz-3. Optical network development can be started in additional Hungarian regions, where coverage is not sufficient enough. Gigabit Hungary. ⁹ Gigabit Hungary Programme – as part of the Digital Renewal Operational Programme Plus - aims to support the digital inclusion of less developed districts, especially in areas where the development of digital networks would not have been profitable on a market basis.
