

Indoor distribution box with 26 slots

5-INCH COLOR TOUCHSCREEN

Intuitive operation, easily accessible with just one touch

Industrial-grade CPU
sensitive response
1 second startup
Smooth experience

AI Overview

A 26-slot indoor distribution box provides secure and organized electrical distribution for 26 circuits, with options for DIN-rail mounting, IP65 protection, and both plastic and metal enclosures. Key Features

Capacity and Layout: A 26-slot distribution box supports 26 circuits, typically divided into zero and ground rows, allowing organized wiring for residential, commercial, or industrial applications (AT-26, BX26) .

Material and Durability: Plastic enclosures (PC/ABS) offer impact resistance, flame retardancy, and thermal stability (-25 to 100°C), suitable for indoor use and some outdoor applications with IP65 rating (BENY BX26, AT-26) . Metal enclosures (cold-rolled iron sheet) provide robust protection, dust resistance, and aesthetic finish, often with adjustable DIN-rails for flexible installation (Futina FTTL series) .

Protection and Safety: IP65 rating ensures protection against dust and water ingress, making some models suitable for indoor and outdoor environments (AT-26) . Flame-retardant materials and hot-wire tested copper terminals enhance safety during high-current operation (AT-26) . Integrated ground and zero terminals simplify wiring and improve electrical safety (Futina FTTL series) .

Mounting Options: Flush-mounted or surface-mounted types are available, allowing installation flexibility depending on wall or panel requirements (Futina FTTL series) . Adjustable DIN-rails accommodate different breaker or fuse configurations, making wiring easier and safer .

Additional Features: Some boxes include anti-theft latches, circuit baffles, and reinforced buckle frames for added security and durability (AT-26) . Compatible with MCBs, fuses, SPDs, disconnectors, or breakers, enabling use as a PV combiner box or standard power distribution unit .

Recommendations: For indoor use, the BENY BX26 or Futina FTTL 26-way MCB box are excellent choices, offering high safety standards, adjustable DIN-rails, and reliable circuit management . If occasional exposure to moisture is expected, the AT-26 waterproof distribution box provides IP65 protection while still...
