

Industrial Ethernet Switch Parameters

Overview

These robust switches are designed for industrial use and are fully compliant with IEEE 802.60W and 90W Power over Ethernet (PoE) options via PoE injectors. According to the 2024 Hourly Cost of Downtime Survey by research firm ITIC, a single hour of unplanned downtime now costs upwards of \$300,000 for over 90% of mid-size and large enterprises. When the penalty for an idle production line is that steep, “saving” \$150 on an underspecified switch is a false economy. WAGO's switch portfolio provides scalable Ethernet network infrastructure with excellent electrical and mechanical performance. The WAGO PoE Splitter (Item Number. Cisco® Industrial Ethernet (IE) 4010 Series Switches with 28 Gigabit Ethernet interfaces, are high-performance ruggedized Layer2/3 switches with high-density Power-over-Ethernet (PoE) capabilities, making them an ideal choice for use as access switches in industrial environments.
