

Irish Industrial Rail Switches

AI Overview

Industrial rail switches in Ireland include newly manufactured turnouts, pre-assembled switches, and crossings suitable for sidings, freight terminals, and port facilities, with both standard and bespoke options available. Overview Industrial rail switches, also known as turnouts or points, are essential components for directing trains between tracks in industrial environments. In Ireland, these switches are used across industrial sidings, train care depots, freight terminals, and port authority installations. They are available in both Flat Bottom and Bullhead rail profiles, and can be supplied as newly manufactured or serviceable pre-assembled units for immediate deployment. Suppliers and Manufacturers Several companies provide industrial rail switches in Ireland: BB Investments Holding offers newly manufactured turnouts, pre-assembled switches, and crossings, along with site inspections, measuring services, and proof-laying for efficient installation. Trackwork Ltd. supplies switches and crossings to Irish Rail, Translink (Northern Ireland), Network Rail, and Isle of Man Railways, providing full prefabrication on timber or concrete, bespoke designs, and adherence to UK and international industry specifications. These suppliers ensure that components meet industry standards and can be customized for specific industrial applications. Services and Installation Industrial rail switch providers in Ireland often offer: Site inspections and measurements to ensure correct component selection. Proof-laying services, where turnouts and crossovers are assembled and marked for inspection before delivery. Bespoke design and manufacturing for non-standard track layouts. Immediate delivery of standard units from stock for urgent projects. Standards and Compliance While specific Irish Railway Standards govern mainline operations, industrial rail switches are typically designed to comply with UK and international specifications, ensuring safety, reliability, and compatibility with existing rail infrastructure. Suppliers often provide documentatio...
