

Italian Intelligent Integrated Power Distribution Box

Overview

Smart Fuse Box is an intelligent power distribution unit, designed for agricultural, off-highway vehicles and buses. This report provides a comprehensive 2026 analysis of the. The device provides power to several high current external loads and contains an high power DC/DC converter. Every output is singularly protected for overcurrent. The ECU can be used to drive, protect and monitor up to 30 loads, through the STi2Fuse, and to interface analog/digital signals and loads via CAN. The organizations that act first will define the competitive landscape. As of the 2026 analysis period, the market is characterized by a transition from basic power distribution to intelligent. All products are specifically designed following MIL-STD-1275 and MIL-STD-461 for EMI and MIL-STD-810G for environmental and provides the highest level of IP protection degree and temperature operative range.
