

Japanese manufacturer of galvanized cable conduit for optical cables

AI Overview

Maruichi Steel Tube, Daiwa Steel Tube Industries, Suntel, and Hagitec are leading Japanese manufacturers of galvanized conduits suitable for optical cables. Key Manufacturers and Products

1. Maruichi Steel Tube Ltd. Maruichi produces hot-dip galvanized steel conduits with high corrosion resistance, suitable for indoor, outdoor, and buried installations. Their conduits are available in thick and thin types, with some plated using a 55% aluminum-zinc alloy (AL-Z55N) to prevent white rust. Accessories such as threadless couplings and bends are also available, making them suitable for optical cable protection in data centers, utility tunnels, and industrial facilities.
2. Daiwa Steel Tube Industries Co., Ltd. Daiwa manufactures conduits using the "Daiwa Z Process", a continuous tube manufacturing and hot-dip galvanizing method. Their Post Zinc (PZ) and Perfect Post Zinc (PPZ) steel tubes are hot-dip galvanized with pure zinc and a protective top coat, offering excellent corrosion resistance and durability under bending. These conduits comply with Japanese Industrial Standards (JIS) and are suitable for harsh environments, including high temperature and humidity, making them ideal for optical cable installations.
3. Suntel Co., Ltd. Suntel specializes in cable conduits for various applications, including optical fiber protection. While specific galvanization details are not listed, Suntel provides a range of conduit sizes and coupling options suitable for telecommunications and data infrastructure projects.
4. Hagitec Co., Ltd. Hagitec offers flexible metal conduits and fiber optic protective tubes, including interlock and braided stainless steel options. Their products are designed to protect optical cables from mechanical damage while providing flexibility for installation in complex routing scenarios.

Considerations for Optical Cable Applications

Corrosion Resistance: Hot-di...
