

KW fan distribution box model

AI Overview

Fan distribution boxes are available for 5.5 kW, 7.5 kW, and 15 kW motors, designed for low-voltage distribution and HVAC or industrial fan applications. Overview A kW fan distribution box is an electrical enclosure that distributes power to fans or motors while providing protection, control, and reliable operation. These boxes are commonly used in HVAC systems, industrial ventilation, and water pump applications. They ensure stable power supply, efficient operation, and safety for connected equipment. Key Features Power Ratings: Models are available for 5.5 kW, 7.5 kW, and 15 kW motors, suitable for low-voltage fans and pumps. Voltage Compatibility: Typically designed for 380V three-phase systems, supporting standard industrial and commercial installations. Construction: Made from cold-rolled steel or stainless steel, with customizable thickness to meet specific durability and environmental requirements. Electrical Components: Equipped with high-quality branded components, CCC certified for safety and reliability. Customization: Options include adjusting material, thickness, and internal parameters to match application needs. Warranty and Maintenance: Many models offer a two-year warranty and support lifetime maintenance. Applications HVAC Systems: Distributes power to building fans, air handling units, and fan wall units, ensuring stable operation and optimal airflow. Industrial Fans: Provides reliable power for ventilation in factories, warehouses, and chemical plants. Water Pumps: Compatible with motor-driven pumps in industrial and commercial settings. Additional Considerations Integration with Fan Units: Some fan distribution boxes are designed to work with fan-powered terminal units or fan wall units, supporting both cooling and heating functions in conditioned spaces. Energy Efficiency: Properly selected distribution boxes help maintain efficient fan operation, reduce energy losses, and support long-term system reliability. Safety and Compliance: Ensure the box meets local electrical standards and certifications for s...
