

Kenya SC fiber optic connectors low-temperature resistant inquiry available

AI Overview

Fast Connector SC/APC fiber optic connectors in Kenya are available, pre-terminated, low-temperature resistant, and suitable for FTTH, LAN, WAN, and CATV networks. Key Features

Connector Type: SC (Subscriber Connector) with APC (Angled Physical Contact) polishing for low insertion loss and high signal quality.

Low-Temperature Resistance: Tested to perform reliably at -40°C , maintaining insertion loss $\leq 0.3\text{ dB}$.

High-Temperature Resistance: Also withstands up to 85°C with minimal signal degradation.

Durability: Built with precision metallic V-groove components, co-axial self-centering, and integrated casing protection to endure harsh indoor environments.

Installation: Tool-free, pre-terminated, and pre-polished design allows fast installation (30-90 seconds in the field) without epoxy or polishing.

Performance: Low insertion loss, high return loss ($>45\text{ dB}$), and reliable fiber alignment through ceramic ferrules and V-groove technology.

Applications: Ideal for FTTH, telecom, CATV, LAN/WAN, patch panels, ONU, and emergency fiber network restoration.

Availability and Inquiry: These connectors are available from multiple suppliers in Kenya, including Almiria Tech Store, HubTech, TechyShop, Tronik, and CTC Solutions. Most suppliers provide online inquiry options or direct contact for purchase, and customer support is available for technical questions or bulk orders.

Advantages

Time Efficiency: Pre-terminated connectors reduce on-site labor and installation time.

Reliability: Designed to maintain performance under extreme temperatures and environmental conditions.

Ease of Use: Tool-free installation makes them accessible to technicians without specialized training.

For inquiries or to purchase, you can contact the suppliers directly through their websites or customer service channels, ensuring you specify the SC/APC type and low-temperature requirement.
