

Kuwait s fiber optic cable remediation

AI Overview

Kuwait is actively upgrading and extending its fiber optic network to enhance connectivity, operational efficiency, and digital infrastructure. Government-Led Fiber Optic Upgrades The Ministry of Electricity, Water, and Renewable Energy (MEW) has initiated a major project to extend fiber optic cables linking existing main substations across key areas, including Shuaiba Industrial Area, Abdullah Al-Mubarak, Jleeb Al-Shuyoukh, Al-Jahra, Al-Qadsiya, Al-Zour, and Shuwaikh Industrial-Educational area. The project involves excavation, laying underground fiber optic cables, and backfilling operations to replace existing overhead lines, improving operational efficiency, remote management, and control of the electrical system . The ministry emphasizes transparency, safety, and minimal disruption during implementation . Strategic Importance and Market Growth Kuwait's fiber optics market, valued at approximately USD 0.7 billion, is expanding due to rising demand for high-speed internet, smart city initiatives, and digital transformation efforts. The government's National Broadband Plan mandates that new developments and major infrastructure projects be fiber-ready, ensuring nationwide high-speed connectivity and supporting cloud services, data centers, and 5G backhaul . Key regions like Kuwait City, Hawalli, and Al Ahmadi are seeing extensive fiber rollouts to meet residential, commercial, and industrial needs . Private Sector and Local Production Companies like Taihan Kuwait are contributing to the fiber optic expansion by producing high-quality optical cables locally, reducing reliance on imports, and supporting the country's long-term development plan, "New Kuwait 2035." This localized production strengthens Kuwait's position as a regional hub for optical cable supply and technology innovation . Subsea Connectivity Kuwait is also enhancing its global connectivity through the Fibre in the Gulf (FIG) submarine cable, secured by Ooredoo. The FIG cable, with 16 fiber pairs and a capacity of up to 480 Tbps, will connect Kuwait to other GCC count...
