

M3 Fiber Optic Sensor Lens

Overview

The Fiber Optic Sensor Focusing Lens provides powerful support for precision detection with its outstanding optical performance and versatile application capabilities. Featuring a unique threaded installation design, it allows for quick and easy installation without the need for. L-com's FOACAMPF4D is an add-on lens for threaded M3 diffuse reflection fiber optic sensor cable. This cylindrical fiber lens is in stock and ready to ship on the same business day as the order. This add-on fiber lens helps increase sensing. Our global manufacturing network for fiber optic sensors in Ayabe (Japan), Shanghai (China) and Nufringen (Germany) focuses on continuously optimising methods for small and large volume production, applying stringent quality control procedures, and expanding production portfolio and flexibility to. A fiberoptic sensor that uses diverse fiber units to support various applications in virtually any environment. These are reliable and easy-to-use devices that have high power, can automatically adjust to real-time conditions, and have a straightforward display that eliminates any guesswork.
