

Material of Portable Power Distribution Box

Overview

Portable distribution boxes are mainly composed of core components such as shells, circuit breakers, sockets, terminals, leakage protectors, fuses, etc. As a protective "armor", the shell is mostly made of high-strength engineering plastics or aluminum alloys. Lex Products offers a full range of portable power distribution boxes and units, specifically engineered for indoor and outdoor use for the entertainment, industrial and military industries. This guide details essential technical parameters and deployment strategies to help you navigate complex. Walther Electric offers stock and custom-built power distribution systems, integrating multiple variations of receptacles, plugs and inlets that are identified as "Combination Outlets". These units make power management efficient and safe by providing access to panels.
