

Mozambique Explosion-proof Distribution Box Model

AI Overview

Explosion-proof distribution boxes for Mozambique are available in ATEX and IECEx certified models, including stainless steel and GRP enclosures suitable for hazardous areas.

Overview Explosion-proof distribution boxes are designed to safely distribute electrical power in hazardous environments where flammable gases, vapors, or dust may be present. These boxes are commonly used in chemical plants, refineries, offshore platforms, and industrial facilities. They are engineered to prevent ignition of surrounding atmospheres and comply with international safety standards such as ATEX, IECEx, and UL.

Key Models and Features

- Stainless Steel Ex Distribution Boxes (AISI 304L / 316L)** Manufactured by companies like Atex Delvalle. Customizable local control stations and distribution boxes suitable for Zones 1, 2, 21, and 22 hazardous areas. Can withstand extreme temperatures and outdoor conditions. Features include LED indicators, voltmeters, ammeters, and modular control elements.
- GRP (Glass Reinforced Polyester) DVT Series** Flexible and configurable in size, terminals, and operators. Lightweight, corrosion-resistant, and suitable for outdoor installations. Compatible with ATEX and IECEx certified components.
- Ex d Flameproof Enclosures (EJB A, EJB S, CSD, GUB Series)** Designed for chemical and petrochemical plants, offshore platforms, and refineries. Provide high mechanical strength and corrosion resistance. Support power distribution, monitoring, and control functions. Certified for hazardous atmospheres with gas and combustible dust.
- Explosion-Proof Circuit Breaker (MCB) Boxes** Energy-efficient and maintenance-free with service life up to 50,000 hours. Protection class up to IP66. International certifications: IECEx, ATEX EU. Suitable for AC100–240V operation and resistant to vibration.

Considerations for Mozambique Ensure the selected model is certified for t...
