

Network cabinet manufacturing and cabinet pricing

AI Overview

Network cabinets range from \$100 for basic wall-mounted units to over \$3,000 for specialized outdoor or soundproof models, with manufacturing options including OEM customization and fully assembled turnkey solutions.

Types of Network Cabinets and Pricing

Wall-Mounted Cabinets: Compact units ideal for small offices or limited-space environments, typically ranging from 6U to 12U. Prices start around \$100–\$200 for basic models, with used units available at lower costs.

Server/Network Cabinets: Standard floor-standing cabinets for data centers or corporate IT rooms, usually 27U to 42U, supporting up to 1,600 lbs of equipment. Prices range from \$500 to \$1,500, with fully loaded 42U cabinets costing around \$1,450.

Outdoor and IP-Rated Cabinets: Designed for weather resistance and harsh environments, including IP55 and IP65 ratings. Prices range from \$800 to over \$3,000, depending on materials, coatings, and additional features.

Soundproof Cabinets: Include insulation to reduce noise by 15–31 decibels, suitable for hospitals, schools, or residential areas, typically at the higher end of the price spectrum.

Manufacturing and Customization

OEM Solutions: Manufacturers like GETEKnet and Enconnex provide OEM cabinets, including floor-standing, wall-mounted, and open racks, with options for ventilation, fan integration, and load-bearing enhancements.

Custom Builds: Many suppliers offer configurable cabinets, allowing clients to specify dimensions, materials (steel, aluminum, sheet metal), and accessories such as PDUs, cable management, and seismic brackets.

Turnkey and Pre-Assembled Options: Companies like Enconnex and Legrand ship fully assembled cabinets with pre-loaded equipment or PDUs, reducing deployment time and ensuring quality control.

Factors Affecting Price

Size and Capacity: Larger cabinets with higher U ratings and weight capacity cost more.
