

New Installation Solution for PDU Fiber Optic Cabinets in the Ten ASEAN Countries

AI Overview

Deploying PDU fiber optic cabinets in the ten ASEAN countries requires modular, internationally compatible, and remotely manageable solutions to ensure reliable power distribution for data centers and fiber networks. Recommended PDU Solutions

1. Modular Rack and Cabinet PDUs
Olabs FiberFlex™ PDUs offer flexible modular designs suitable for server racks, wallmount racks, and LAN racks. They support UK (BS1363) and IEC320 C13 connectors, with horizontal or vertical mounting options, customizable cable lengths, and socket configurations to match local power standards. Gcabling PDUs provide standard, smart, and industrial PDUs with 360° rotating installation options, flame-retardant materials, and country-specific socket modules, ensuring safety and compliance with CE and RoHS standards.
2. Floor-Standing and Cabinet PDUs
Eaton's cabinet and floor-standing PDUs are ideal for large data centers, offering three-phase power distribution, voltage regulation, harmonic reduction, and monitoring capabilities. They can integrate with managed rack PDUs for branch-level control and support software aggregation via Eaton's Brightlayer platform.
3. Fiber Network-Specific Power Systems
EnerSys Alpha® XM3.1-HP™ and Alpha LPE/FPE enclosures provide reliable power for remote OLTs in fiber-to-the-premise (FTTP) deployments. These systems include battery backup for extended outages, remote management via fiber ports, and weather-protected enclosures, suitable for rural or greenfield installations.
4. Universal Cabinet Platforms
Panduit FlexFusion™ Cabinets offer a universal platform for hyperscale, edge, and multi-tenant data centers. They support high airflow, heavy load capacity, and pre-config...
