

New Trends in AI Servers

Overview

Dell, HPE, Lenovo, and Supermicro are riding record AI server demand, but winning enterprise customers requires more than just Nvidia chips. With GPUs standardized around Nvidia, vendors compete on AI Ops, liquid cooling, and deployment services as enterprises ramp up inference in 2026. Image:. North American CSPs' continued investments in AI infrastructure are expected to increase global AI server shipments by more than 28% YoY in 2026, according to the latest market research from TrendForce. The rapid growth of AI inference services is boosting demand for general-purpose servers. The AI server market is projected to reach USD 837. 83 billion by 2030 from USD 142. 45% during the forecast period 2026-2032. The AI Server Market encompasses the production, distribution, and utilization of specialized computing systems.
