

New Zealand Easy-to-Install Cable Tray Installation

AI Overview

New Zealand offers a range of durable, compliant cable tray systems with professional installation services for commercial, industrial, and infrastructure projects. Overview of Cable Tray Systems Cable trays are essential for organizing, supporting, and protecting electrical, data, and communication cables. They provide a safe, economical, and efficient alternative to traditional open wiring, allowing for easy access, ventilation, and future maintenance. Common types include: Ladder trays: Ideal for heavy power cables and long spans. Basket trays: Suitable for lightweight data and AV cables. Solid-bottom trays: Used where extra protection is required. Modular and adjustable systems: Allow flexibility for complex layouts and future changes. Key Suppliers and Services Mechanical Support Systems (MSS): MSS provides end-to-end solutions, including design, local manufacturing, and professional installation. Their systems are seismic compliant (NZS 4219), fire-tested (AS/NZS 3013:2005), and supported by ISO 9001 and ISO 45001 certifications. MSS also offers BIM modeling, custom steel components, and onsite installation by trained crews. Equip Supply Ltd: Offers Stern Cable Trays, which are durable, easy to install, and suitable for both electrical and data cabling. These trays are designed to reduce installation time while maintaining neat and safe cable management. Steel & Tube: Provides a full range of EzyTray cable trays and ladders, with access to BIM-enabled 2D and 3D CAD files for project planning. They also offer full take-offs and quotations from plans. USL Multistrut: Specializes in electrical and mechanical support systems, including cable trays, pipework, and seismic bracing. They supply pre-fixed joiners to reduce installation time and labor costs, with products designed to meet New Zealand standards. FDG Cable Support Products: Offers a modular, versatile range...
